HOMEWORK 1

Ex hurricane Rafael is moving now above the North Atlantic. A 4-day prediction shows the pressure map on the 20th of October.

Determine the approximate wind speed at point A.

The centre is at about 54°N, 26°W, Smallest pressure in the centre is 960 hPa. The Earth's diameter is 12,756 km.

(T: low pressure, H: high pressure)
